

Description: Head Light  
Part Number: 111135-111130  
Application: 2007-2008 Toyota Tundra/ Sequoia

Tools needed: 10mm socket,  
flat head screwdriver, wire  
splicer, electrical tape.

Step 1: Use the flat head  
screw driver to remove the  
two push pins holding in the  
bottom head light cover.

Step 2: Remove the bottom  
head light cover.

There will be two insert plastic  
pins holding the cover in  
tightly, be careful not to break  
this.

Step 3: Use the 10mm socket  
to remove the two bolts on top  
of the headlight.

Step 4: Use the 10mm socket  
to remove the bottom bolt  
holding in the headlight.

Step 5: There will be a clip on  
the bottom inner corner  
holding the headlight that will  
need to be pushed into the

Step 6: Remove the headlight  
from the vehicle.

Step 7: Unplug the wire  
harness for the turn signal.

Step 8: Unplug the wire  
harness for the high beam.

Step 9: Unplug the wire  
harness for the low beam.

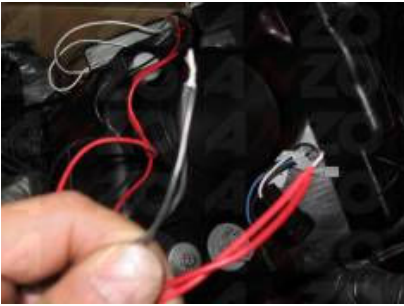

Step 10: Unplug the wire harness for the parking lights.

Step 11: Pull back the cover to expose the wires for the parking lights.

Step 12: Take out the new Anzo headlight from the box.

Step 13: On the back of the light locate the two red wires and twist together and the two black wires twist together.

Step 14: Now splice the red wires to the green wire on the stock wire harness and the black to the white wire.

Step 15: Use the electrical tape to wrap up the exposed wires and plug in the parking light wire harness to the new

Step 16: Turn on the parking lights to make sure the halos and leds are working properly.

Step 17: If the leds do not turn on twist off the led parking socket and reverse the connection on the head light.

Step 18: Plug in the low beam wire harness.

Step 19: Plug in the high beam wire harness.

Step 20: Plug in the turn signal wire harness.

Step 21: Put the new Anzo headlight into the vehicle.

Step 22: Test all functions to make sure they are working properly before driving.
